Hello there!

We're Aiolane - a custom software development company, member of High Technologies Park. Right now, we are looking for a React developer to join our team.

### Responsibilities:

- Build client-side applications using JS / TS, Angular, ReactJS and other frameworks;
- Create, edit and update pages, templates, modules and tools with HTML, CSS and TypeScript / JavaScript for desktop, tablet and mobile sites;
- Find proper ways and tools for the job to be done (including choosing the libraries and frameworks for the specific tasks);
- Test and debug frontend code;
- Refactor and support existing codebases.

### Requirements:

- Deep knowledge of front-end stack (JavaScript / TypeScript / React / Redux / HTML / CSS);
- Experience with React+MobX;
- Understanding of the principles of functional programming;
- The angular framework is a plus;
- At least an intermediate level of English.

### What we offer:

- Interesting projects from foreign customers;
- Work in a team of experienced Senior-level developers;
- Modern office near the underground station (S.Union business-centre);
- Fair salary, bind to USD;
- Flexible work schedule;
- Loyalty program (goods and services at a discount for Aiolane employees);
- English courses.
